Hill Maria

But in many villages instead of a communal *pedawo'gha'i* there is a separate hut at the back of each long-house for the use of the residents of each house contained in the long-house, called by the same name; or else in each house there is a *pedawo'gha'i* room known generally as *kala*,[1] with a door opening at the back of the house, separated from the rest of the house by a *binda* or low mud threshold about three feet from the back door. It is absolutely *polo* or taboo for any male to set foot in the menstruation hut or room; I once saw a son who wanted to enter the house by the back door take a flying leap from outside so as to land beyond the *binda*. In every *kala* room there is a complete set of cooking vessels and utensils for the woman to use while she is in her courses, when it is *polo* for her to touch any of the regular household articles. The menstruation hut or room is also the scene of all child-births.

There is in some big villages a resting hut for travellers or State officials, known as the *paik-gotul* or *Kos-gotul*; *paik* is the word used for a member of the old militia, and *Kos* is the general word used by all Gonds for Hindus. This may also have a stable attached.

The sketch-plan on page 105 illustrates a fairly typical Hill Maria village, crowning a mountain spur; it represents the site occupied in 1930 by the Kutru Mar village of Karangal. The long-houses here had nearly all of them bamboo fences between them and the street, running along their front about three or four feet from their front wall. The doors have been shown only in the houses in long-house no. 6. The fences only give a little privacy, and spaces useful for storing fuel; they are not garden (*bari*) enclosures. Bamboo is very plentiful around Karangal; where it is less common, these fences are absent. The stockades of thick poles at the eastern side of this village were made to afford protection from the fierce and cold wind blowing off the hills from the north-east. The Village Mother's shrine was a cylindrical basket of stones resting on five boulders in the open space between the dormitory and the *kotyoq-gaita's* house, near the latter's *udam-garia* seat of honour. This seat was a flat slab of stone resting on five thin slabs stuck vertically in the ground. The *pen-rawar* shrine of the clan-god Koruk Pen was a round hut surrounded with a bamboo fence to the east of the village by the side of the path leading to the *penda* fields; there is another shrine of this god at Nugur, a Parlio clan village a few miles away in the Indrawati valley. In Karangal the only non-Maria was a Maria-speaking Rawat herdsman, who was allowed a house site at some distance from the main street;

[1] Or *ala*: the aspirate is often dropped by Hill Marias.

Hill Maria

342 Rough ground-plans of three typical Hill Maria houses are given in the illustration on page 111. The Nugur house was the end house of a long-house, and faced south on to the main village street. It differs from the other two in having no partition wall between the veranda (*algi*) and the *angadi*, or women's kitchen and sleeping room; the *angadi* in this case is in fact almost a continuation of the veranda round the eastern side of the *lowa*. The husband actually slept in the veranda and his wife in the *angadi* in warm weather, but in the *lowa* in winter and rains. This house had no *kala* or menstruation room, because the village had a communal menstruation hut; so also the house had no back door.

Houses

The Kurmer house faced north on to the main street, and was the central house of a long-house of three houses; its western and eastern walls were thus only partitions separating it from the other two houses. It was itself almost two houses, as the widowed mother [592] of Dedha Keye, the occupant, had the eastern *algi*, *angadi* and *lowa* for her exclusive use; but there was no door between her portion of the *algi* and Keye's portion, only a partial continuation across the veranda of the partition wall between her and Keye's rooms. The widow was too old to need a *kala*, and so there was only one for Keye's wife in his part of the house, and this had a back door. Like the Nugur house, this house had no *agha* room.

The Handawada secular headman's (*pedal's*) house was at the north end of a long-house containing three houses and facing west on to the village street; the other two houses had their verandas (*algi*) and entrances on the street side, facing west. His *algi* was therefore very small, and only nominally walled off from the open ground to the north of the house by a bamboo wicker-work fence [351] about 3½ feet high, being thus useless for keeping property. Where, as in the other houses illustrated, the veranda is in front of the house and parallel to the roof-tree, it is easy to construct a front wall as high as the roof, which is there barely 3½ feet above the ground.

342 The *agha* is the husband's living and sleeping room, and it is
513 taboo (*polo*) for his wife, a mature daughter or any woman to sleep
784 in it; but boys too small to sleep in the bachelors' dormitory and immature daughters may sleep there. In hot weather the males of the family often sleep under the granary, which is built on piles, and when houses have no *agha* this is the usual sleeping place at all times for the men of the family, and for male guests except when the latter can be accommodated in the village dormitory
342 (*gotal-lowa*). It is strictly taboo for any female to enter a granary,
513 or to sleep under one. Every *agha* has a large *alpanji* or sleeping

Hill Maria
Bison Horn Maria

361 The villages being permanent in comparison to the Hill Maria villages, they are apt naturally to be considerably dirtier, and this is 364 accentuated by the far larger numbers of cattle and goats that the 177 greater wealth of the Bison-horn Marias enables them to keep. The houses, too, are far dirtier and more smoke-grimed, though in places the Hindu practice of constantly replastering the floors with fresh cow-dung is coming in. They are smaller also, as the spread of cultivation has restricted the available sources of timber and bamboo; but where ample forest is near, the houses are larger, and sleeping sheds for the men as well as cattle byres make individual homesteads appear larger than the homes of the Hill Marias.

342 The long-houses of the Hill Marias are never seen in the Bison-361 horn Maria villages. Individualism is becoming yearly more marked among the Bison-horn Marias, and every man likes to have his own house and property distinct from his brothers and cousins. Their houses, instead of being parallel to the village street are generally at right angles to it, and a double row of houses, one on each side of the street, is often impossible, because the houses are too close to each other to allow each house to have its *bari* (garden enclosure) behind it, so that some householders (like those of houses B and E in the rough sketch of part of Telam village on page 121) must have their *bari* opposite them across the street. Each [351] *bari* is fenced right round with bamboo wattle-work, so that the fences of the *baris* opposite the line of houses appear like a continuous wattle-work wall along one side of the street. But there may be in the middle of the street occasional granaries or other buildings, and the houses are often irregularly scattered about with no pretence of formal alignment, so that the ordered arrangement of a Hill Maria village is completely absent. There are as many [231] pig-sties in Bison-horn as in Hill Maria villages, but they are far less elaborately and adequately constructed, though protected, like the Hill Maria sties, by leaning thatches from the sun.

361 The houses of the clan that founded the village are usually all together in one group, and there are separate groups for each of the clans with which it intermarries.

343 There appears to be no common menstruation hut among 841 the Bison-horn Marias, nor, indeed, any special menstruation room in their houses. A special hut or booth is erected near the house for the delivery of a child, and in a few villages near the borders of the Hill Maria country there is a hut called the *Piki-kurma* for each group of houses, where apparently young girls are segregated for their first menstruation; but I noted that I might have misunderstood the information that I was given about this hut, and in villages in the heart of the Bison-horn country was definitely told

Muria

of the ghotul, though they are usually appropriated by particular boys for the period of their membership.

In eastern Kondagaon drums are usually kept in the ghotul; at Masora a dhol-drum hangs under the verandah roof—it is the local habitation of Lingo

Pen. At Dongrigura and other villages in this area, the whole ceiling is of drums, a fine and impressive sight. Special officers are appointed to provide rope for hanging them up and to see that they are kept in good order.

Flutes are often pushed into the thatch, but dancing-sticks are kept in the shrine of the Village Mother. I have never seen the emblem of a god, a flag or a 'horse' in the ghotul, nor any village symbol, but in Palli Barkot there was a bundle of blessed seed hanging from the roof.

There are often little holes in the wall for keeping tobacco and other small treasures. Sometimes too there are holes in the floor—for husking the rice that is brought home from the Pus Kolang and other expeditions. In one or two ghotul I have seen holes low down in the wall to serve as urinals. Outside in the courtyard there may be a large flat stone for washing clothes, but this is probably an innovation for the benefit of outsiders.

Inside the ghotul compound there is generally a stack of grass for thatching the roofs. Outside are tall piles of firewood, which may be stacked criss-cross about a central pole or piled up in the forked branches of a tree. Sometimes long poles are stood upright against and round a tree. In Jhakri I saw near the ghotul four different ways of storing the chelik's wood—it was stacked horizontally criss-cross round a tree; it was laid in parallel rows between two trees; it was criss-crossed between two upright poles tied together at the top by a rope; and it was stacked upright against a tree.

These stores of wood play an important part in the consciousness of every Muria boy, for his earliest ghotul memories are of his duty to add one or two pieces to them every evening, failure to do so earning dreaded punishments.

pull themselves up by their arms, to kiss them. I remember straining up, and at last reaching the yellow pitch pine and the two crimson lips. They looked indecent, for some reason; as if they were the drawing of another part of the body.' If the boys were not quick or could not reach the lips, they were flicked with wet towels as an encouragement.
